Company Name
Address
City, State, Zip
Country
____ Month ____ Year
TSCA Title VI Compliant
California 93120
Compliant
For Formaldehyde
Phase II

Fabricators of finished goods containing composite wood products must label every finished good they produce or every box or bundle containing finished goods.

If a finished good (including component parts sold separately to end users) is not individually labeled, the importer, distributor, or retailer must retain a copy of the label, be able to identify the products associated with that label, and make the label information available to potential customers upon request.

(1) The label may be applied as a stamp, tag, or sticker.

(2) The label must include, at a minimum, in legible English text, the fabricator's name, the date the finished good was produced (in month/year format), and a statement that the finished goods are TSCA Title VI compliant.

Finished goods made from panels manufactured in accordance with § 770.17 and/or § 770.18 may also be labeled that they were made with no-added formaldehyde-based resins, or ultra low-emitting formaldehyde resins in addition to the other information required by this section. They may be labeled as being made with a combination of compliant composite wood, no-added formaldehyde-based resins, and ultra low-emitting formaldehyde resins, if this is accurate.

(4) Fabricators may substitute the name of a responsible downstream fabricator, importer, distributor, or retailer for their name on the label if they obtain and maintain written consent from the downstream entity.

(d) Importers, distributors, and retailers must leave intact labels on finished goods, including component parts sold separately to end users

CALIFORNIA CARB LABELING

California will accept furniture that is only labeled as being EPA TSCA Title VI compliant, although we suggest labeling products as being both EPA and CARB compliant, because many retailers and consumers in California are accustomed to seeing the CARB Phase 2 label.
